

YAW ASSENSOH OPOKU

Operations & Logistics Analyst · Supply Chain Intelligence · Python · SQL · Tableau · Streamlit
+49 157 3806 5664 | EU Citizen | Hamburg, Germany | Open to Relocation (Italy) & Remote | [Portfolio](#) | [GitHub](#) | [Tableau Public](#)

PROFESSIONAL PROFILE

Operations professional with 5+ years of hands-on P&L ownership in freight logistics — including founding and scaling a Hamburg-based freight company from zero to six-figure annual revenue with 6 employees and 20+ active clients across the DACH region. Now combining that operational depth with advanced data skills (Python, SQL, Tableau, Streamlit) to translate logistics and commercial data into decisions that drive efficiency, reduce cost, and improve performance. Delivered measurable results: 15% improvement in delivery efficiency, 20% increase in repeat business, and 25% reduction in vehicle downtime. Fluent in English, Italian, and German — available immediately, open to Hamburg, northern Italy, and remote roles.

CORE COMPETENCIES

Operations & Logistics P&L Ownership · Route Optimisation · Fleet Coordination Demand Forecasting · Subcontractor Management Supply Chain Analytics · Process Improvement	Data Analytics & Visualisation Python (Pandas, Scikit-learn) · SQL · PostgreSQL Tableau · Streamlit · Excel (Advanced) Jupyter Notebook · Git / GitHub	Analytical Methods ARIMA/SARIMA Forecasting · KPI Design K-Means Clustering · RFM Segmentation A/B Testing · Predictive Modelling
---	--	---

PROFESSIONAL EXPERIENCE

Founder & Operations Analyst Black Excellence Transport · Hamburg, Germany	Jan 2020 – Mar 2025
- Founded and scaled a freight operation from zero to six-figure annual revenue, managing 6 employees, a broad subcontractor network and full commercial responsibility across the DACH region. - Built demand forecasting models in Python and SQL to anticipate volume and revenue trends — consistently exceeded monthly revenue targets by 10–15%. - Designed and maintained real-time KPI dashboards in Tableau and Excel tracking delivery performance, cost efficiency and revenue across 20+ client accounts, turning raw operational data into daily business decisions. - Performed RFM customer segmentation to identify high-value accounts and redesigned the retention strategy, achieving a 20% increase in repeat business. - Optimised delivery routing and subcontractor dispatch through operational data analysis, reducing dead mileage and improving overall delivery efficiency by 15%. - Automated weekly and monthly reporting pipelines using Python and SQL, eliminating manual effort, improving data consistency and freeing capacity for strategic analysis. - Managed all contract negotiations, cost modelling and partner relations — direct commercial interface between clients, drivers and logistics partners.	
Team Leader & Dispatcher MH Transport (DPD Hamburg) · Hamburg, Germany	Oct 2016 – Dec 2019
- Led daily logistics operations and dispatch coordination for 30+ drivers across multiple Hamburg routes, maintaining a 99% on-time delivery rate. - Introduced a data-driven vehicle compliance and safety tracking system, reducing maintenance-related downtime by approximately 25%. - Produced weekly and monthly operational performance reports for senior management — clear, decision-ready outputs used directly for resource allocation. - Managed real-time escalation for route exceptions, driver incidents and client service failures.	
CNC Machine Programmer Busatto Legno · Scorzè, Venice, Italy	2008 – 2016
Precision manufacturing in regulated production environments — process optimisation, quality control, calibration and technical documentation in high-tolerance settings. Built the structured, analytical thinking that underpins all subsequent	

work.

ANALYTICS PORTFOLIO — SELECTED PROJECTS

All projects include live Streamlit dashboards or published Tableau workbooks, documented code on GitHub, and measurable outcomes. [Full portfolio →](#)

- EU Gender Pay Gap — End-to-End Analysis**

Excel · PostgreSQL · Python · Tableau

Flagship project spanning four analytical phases. Key finding: the EU pay gap fell from ~18% to ~10.5% (2002–2024) but projects equality at ~2100; Finance & Insurance confirmed as a statistical outlier; motherhood penalty validated via paired t-test across all 27 EU countries.
- NYC Citi Bike — Supply Chain & Demand Optimisation**

Python · Pandas · SARIMA · Streamlit

Demand forecast model across 1,500+ stations with 0.82 temperature-usage correlation. Built 4-week advance planning tool; dynamic pricing simulation projected revenue uplift of 20–25%.
- US Housing Affordability — Market Intelligence**

Python · SQL · K-Means · SARIMA · Streamlit

Live dashboard combining K-Means market clustering, SQL-based affordability risk scoring and a 36-month SARIMA price forecast across five US cities.
- Influenza Staffing Forecast — Resource Planning**

Python · ARIMA · Scikit-learn · Tableau

ARIMA model achieving 89% accuracy for 4-week patient admission windows — optimised staffing schedules and reduced projected overtime costs by 23%.
- Fleet Operations Intelligence Dashboard**

Python · SQL · Tableau · Streamlit

Operational analytics dashboard built from real freight logistics experience. In development — expected Q3 2026.

EDUCATION & CERTIFICATIONS

- Data Analytics Certification (Full-Time, 12 months)**

Jan 2025 – Mar 2026

CareerFoundry · Python, SQL, Statistics, Machine Learning, Tableau, applied project work
- High School Diploma (Abitur equivalent)**

2009 – 2012

CPIA Giuseppe Verdi, Italy
